

SHALINI BANGAMUWAGE

IT Undergraduate — Full-Stack Developer

076-0273368 | shalini.bangamuwage@gmail.com | Matara, Sri Lanka |
github.com/ShaliniBangamuwage | linkedin.com/in/shalinibangamuwage

PROFILE

- High-achieving Information Technology undergraduate at the University of Moratuwa with a 3.84 GPA.
- Full-stack development experience across core technologies — React, Node.js, NestJS, MongoDB, Firebase, and Firestore.
- Built and deployed web, mobile, and embedded hardware projects, with skills spanning responsive UI development, RESTful APIs, authentication, database design, and third-party integrations.
- Director-level IEEE contributor, coordinating membership initiatives and event logistics across 4 university tech events — MERCon, Open Week, Robotics Day, and Hackelite.

EDUCATION

University of Moratuwa — Faculty of Information Technology GPA: 3.84

- Undergraduate, BSc (Hons) in Information Technology (2024–2028)

St. Thomas' Girls' High School (2014–2022)

- G.C.E. A/L: Physical Science stream — A, A, B (2022); District Rank 142; Z-Score 1.82

PROJECTS

MediCareX — Pharmacy Management System (Customer Dashboard & Pharmacist Features)

React (Vite), NestJS, Firebase/Firestore, Cloudinary

GitHub: github.com/SoftwareProjectInnovateX/Softwareproject23fontendMediCareXgroup8

- Engineered customer and pharmacist-facing features across 6 modules — browsing, reviews, prescriptions, messaging, orders, and delivery tracking — using React and NestJS.
- Architected real-time data sync and authentication with Firebase/Firestore, powering customer-specific carts and order workflows, and integrated Cloudinary for prescription-image storage — 2 third-party platforms in total.
- Designed 4 AI-driven features — brand recommendations, order insights, loyalty offers, and churn-risk analysis — using customer purchase and prescription history.

PaperPulse — AI-Powered Research Paper Analysis Tool

Next.js, Supabase, Groq API, Semantic Scholar API, PayHere

GitHub: github.com/ShaliniBangamuwage/paperpulse

- Built and deployed a full-stack SaaS platform with Next.js and Supabase, live at paperpulse-taupe.vercel.app, supporting 2 subscription tiers (Free/Pro).
- Integrated 4 third-party services — Groq AI for paper insights, Semantic Scholar for research metadata, Google OAuth for login, and PayHere for subscription billing.
- Delivered an admin dashboard and Kanban board for managing saved research ideas.

HabitAutopsy — AI Habit-Tracking App

React Native (Expo), Node.js/Express, Supabase, Groq API GitHub:

github.com/ShaliniBangamuwage/habit_tracker

- Shipped a cross-platform habit-tracking application spanning 3 platforms — iOS, Android, and web — using React Native and Expo.
- Implemented Node.js/Express REST APIs backed by Supabase for data storage and authentication.
- Resolved authentication and Expo SDK compatibility issues across multiple release cycles; used Groq API to generate AI-driven habit-analysis reports.

EduLanka — Government School Textbooks & Past Papers Platform

Next.js, React, TypeScript, Tailwind CSS, Supabase, Meilisearch, PWA GitHub:

github.com/ShaliniBangamuwage/Government_school

- Architected a responsive learning platform using 4 core technologies — Next.js, React, TypeScript, and Tailwind CSS — spanning grade- and subject-based content.
- Configured Supabase for authentication/database management and Meilisearch for fast lesson and topic search.
- Added 3 features — quizzes, downloadable provincial exam papers, and PWA support — for an app-like, offline-capable mobile experience.

Restaurant E-Commerce Website

React, Tailwind CSS, Node.js, Express, MongoDB (Mongoose)

GitHub: github.com/ShaliniBangamuwage/cafe-fullstack-app

- Constructed a full-stack ordering system with a React/Tailwind frontend and a Node.js/Express REST API, managing 3 core data models — menu items, customers, and orders.
- Modeled those data relationships in MongoDB using Mongoose schemas.

Laser Tune — Hardware Project

Arduino Mega, ESP32, C++, Embedded Systems

GitHub: github.com/kevizamarz/LaserTunesCode

- Assembled an embedded musical device using Arduino Mega, ESP32, VS1053B audio codec, piezo/FSR sensors, and a custom PCB.
- Programmed C++ firmware to process real-time sensor input and trigger audio playback.

Portfolio Website

React, Tailwind CSS, JavaScript

GitHub: github.com/ShaliniBangamuwage/my-portfolio

- Designed and deployed a responsive personal portfolio showcasing 6+ projects and technical skills.

VOLUNTEER EXPERIENCE

Director of Membership Development & Volunteer Coordination — IEEE WIE Student Branch Affinity Group, University of Moratuwa

- Direct membership engagement, volunteer onboarding, internal communication, and partnership outreach across 4 focus areas for IEEE WIE activities.
- Co-Chair, Enginuity 3.0 (2026) — lead planning, logistics, volunteer allocation, and event execution.
- Lead logistics planning for IEEE Industry Applications Society events, coordinating venues, schedules, equipment, and volunteers across 4 logistics areas.
- Supported operations across 4 major events — MERCon, Open Week, Robotics Day, and Hackelite — covering technical activities and participant coordination.

CERTIFICATION

- **Diploma in Website Development Using HTML and CSS** — Alison, Feb 2025 | Credential ID: 3972-46531290
- **Python from Zero-to-Hero (Beginner's Level)** — Udemy, Feb 2025 | Credential ID: UC-11e166a5-2b3c4302b5646ad86e6b54e5
- **Career Essentials in Software Development** — Microsoft & LinkedIn, Feb 2025
- **AWS Cloud Essentials – Knowledge Badge Readiness Path (including Labs)** — AWS Training & Certification.

SKILLS

- Languages: Java, C/C++, JavaScript
- Frontend: React, Tailwind CSS | Backend: Node.js, Express, NestJS
- Databases: MongoDB, Firebase/Firestore, Supabase (Postgres)
- Tools & Other: Git, Arduino, embedded systems, REST API design

LANGUAGES

- English
